

Name _____

Day 1

The movie theater had 352 people in it. If the people split into 8 even groups to watch different movies, how many people will watch each movie?

$$543,286 + 215,740 =$$

Write the number in expanded form.

seven hundred twenty-one thousand nine hundred four

The perimeter of a rectangle is 222 millimeters. If the length of the rectangle is 60 millimeters, what is the width of the rectangle?

Write the equation.

During the year, Myong travels 5,678 miles by airplane. He travels twice as many miles by train. How many miles does Myong travel by train?

$$700,000 \div 70,000 =$$

Jacob and Dustin collected 245 cans for the school can drive. They gave 55 cans to Dustin's little sister for her class to get credit. How many cans does this leave for the boys' class?

$$1,002 \div 2 =$$

Day 2

Day 3

Rudy has 10 white seashells, 23 pink seashells, and 21 brown seashells. If he divides his seashells equally between 3 friends, how many seashells will each friend get?

Round 213,548 to the nearest hundred thousand.

The area of a rectangle is 1,035 square centimeters. If the length of the rectangle is 3 centimeters, what is the width of the rectangle?

Write <, >, or = to make the statement true.

$$94,306 \bigcirc 94,360$$

Determine the 30th shape in the pattern.

$$89 \times 55 =$$

List the factors of 75.

Is this number prime or composite?

$$2,002 \times 4 =$$

Day 4

Name _____

Week #17 Assessment

1. $4,012 \div 2 =$	2. The area of a rectangle is 6,384 square yards. If the width of the rectangle is 7 yards, what is the length of the rectangle?
3. The movie theater donated 648 tickets to 9 schools. If the movie theater donated the same number of tickets to each school, how many tickets did each school receive?	4. $35 \times 96 =$
5. $49,320 + 36,249 =$	6. Round 743,214 to the nearest ten thousand.
7. A blue whale traveled 495 feet the first time it was sighted. The second time it was sighted, the blue whale had traveled 6 times as far as the first time. How far did the blue whale travel altogether?	8. $6,567 \times 3 =$
9. The perimeter of a rectangle is 154 feet. The length of the rectangle is 55 feet. What is the width of the rectangle?	10. Write the equation. Mrs. Chung has 33 students in her fourth-grade class. Her students are making collages on Friday, so she brings in 5 magazines for each student. How many magazines does Mrs. Chung bring to class?
